

Accelerate to Zero

A path to a sustainable future

Concept

1. Event goals

- **Inform and educate** employees about the importance of decarbonization.
- **Engage employees** in the company's sustainability initiatives.
- Foster a sense of shared **responsibility and collaboration**.
- Communicate AEG Gas's **strategic direction and commitment to a carbon-neutral future**.

Preliminary planning and stakeholder engagement:

1. **Formation of a cross-functional planning committee:** Include representatives from key departments like sustainability, HR, communications, operations, and IT, ensuring a diverse perspective and expertise.
2. **Employee surveys** - Gather employee feedback on preferred topics of interest, and concerns - this ensures the event is relevant and engaging.
3. **Executive leadership alignment:**
 - Present the event concept and objectives to top management for approval and support.
 - **Budget Planning:** Establish a preliminary budget outline. Include costs for venue, catering, speakers, technology, marketing materials, and contingency.
 - Secure necessary budget and resources.
 - No. of participants: 200-300 (TBD)
4. **Expert consultation:** Invite experts in sustainability, renewable energy, and climate change to provide insights and presentation to add credibility and depth to the event.

2. Planning

1. Keynote presentations:

- Industry leaders and company executives discussing the global energy transition and AEG Gas's role. Focus on the "why" and "how" of decarbonization.

2. Interactive workshops:

- Breakout sessions focused on specific topics (Renewable energy technologies; Carbon capture and storage; Sustainable transportation; Employee engagement in sustainability)
- **Encourage active participation and knowledge sharing.**

3. Technology showcase:

- Demonstrations of innovative technologies and solutions related to decarbonization.
- Include virtual reality experiences, interactive displays, and prototypes.

3. Event structure and content

4. Q&A sessions:

- Provide opportunities for employees to ask questions and engage in discussions with experts and executives.
- Foster transparency and open communication.

5. Networking opportunities:

- Breaks and social events to facilitate informal discussions and relationship building.
- Create a collaborative and inclusive atmosphere.

6. Sustainability fair:

- booths with information about internal and external sustainability programs.

3. Event structure and content

4. Catering, beverages, and logistics

01.

Catering:

- Provide sustainable and locally sourced food options.
- Offer vegetarian and vegan choices to accommodate dietary needs.
- Consider a buffet style service, or food stations, to reduce waste.

02.

Beverages

- Offer water stations with reusable cups.
- Provide coffee, tea, and other beverages.
- Avoid single use plastic.

03.

Logistics:

- Ensure adequate seating and space for all attendees.
- Provide clear signage and directions.
- Arrange for technical support.
- Plan for waste management, and recycling;
- Provide easy access to restrooms.
- Ensure the venue is accessible for all employees

A person wearing a brown coat is standing in front of a glass wall. Teal streamers are draped around them. The text "Thank you!" is centered on the image.

Thank you!
